ACCOUNTING POLICIES AND NOTES ON ACCOUNTS

STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES:

Basis of Accounting:

The financial statements have been prepared in accordance with the generally Accepted Accounting Policies (GAAP) and presented under the historical cost convention on accrual basis of accounting to comply with the accounting standards prescribed in the Companies (Accounting Standards) Rules, 2006 and with the relevant provisions of the Companies Act, 1956.

Fixed Assets:

Tangible Fixed Assets:

Tangible fixed assets are carried at cost less accumulated depreciation and impairment losses. The cost represents the cost of acquisition / construction which includes taxes, duties (net of CENVAT / VAT set offs availed) and other identifiable direct expenses. Borrowing cost directly attributable up to the period of the assets put to use is included in the cost of distinct fixed assets.

Intangible Assets are amortised over their estimated useful life. The estimated useful life of the intangible assets and the amortisation period are reviewed at the end of each financial year and the amortization method is reviewed to reflect the changed pattern.

Impairment of Assets:

The carrying amounts of assets are reviewed at each Balance Sheet date in accordance with accounting standards – 28 'Impairment of Assets' to determine whether there is any indication of impairment based on internal / external factors.

An impairment loss is recognized in the statement of Profit & Loss wherever the carrying amount of an asset exceeds its recoverable amount.

The impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortization if no impairment loss had been recognized.

The recoverable amount is the greater of the assets net selling price and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value at the weighted average cost of capital.

Investments:

Non-current investments are carried at cost. Provision for diminution in the value of non-current investments is made only if such a decline is other than temporary in the opinion of the management.

Current investments are carried at lower of cost and fair value. The comparison of cost and fair value is done separately in respect of each category of investments.

On disposal of an investment, the difference between its carrying amount and net disposal proceeds is charged or credited to the statement of Profit and Loss. Profit or loss on sale of investments is determined on a first-in-first-out (FIFO) basis.

Investments in properties are carried individually at cost less depreciation and impairment if any. Investment in properties are capitalized and depreciated in accordance with the policy stated for fixed assets. as an expense in the statement of profit & loss during the period in which the employee renders the related service.

Defined benefit plans:

The company's gratuity plan is a defined benefit plan. The present value of gratuity obligation under such defined benefit plan is determined based on an actuarial valuation carried out by an independent actuary using the Projected Unit Credit Method, which recognizes each period of current and past service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation. The obligation is measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans, is based on the market yields on Government securities as at the valuation date having maturity periods approximating to the terms of related obligations. Actuarial gains and losses are recognized immediately in the statement of profit and loss.

Gains or losses on the curtailment or settlement of any defined benefit plan are recognized when the curtailment or settlement occurs.

Provisions, Contingent Liabilities and Contingent assets:

A provision is created when there is a present obligation as a result of a past event that probably requires an outflow or resources and a reliable estimate can be made of the amount of the obligation.

A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow or resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

The company does not recognize assets which are of contingent nature until there is virtual certainty of reliability of such assets. However, if it has become virtually certain that an inflow of economic benefits will arise, asset and related income is recognized in the financial statements of the period in which the change occurs.
